

05.INDUSTRIAL

5.1Introduction

Nallur Divisional Secretariat is situated in the most important place in Jaffna District. Its importance is due to its distribution of population and the location. The industrial sector seems to be comparatively higher due to the higher living standard, high literacy level and availability and high distribution of resources for the production & employment activities.

Industrial sector in the Nallur division includes small and medium scale, small industries, cottage industries and handicrafts sector. Industrial producers face many difficulties and problems in expanding or improving the industrial sector due to lack of inputs from Southern part of the Country.

5.2 Mineral Resources in Division

Sand and salt are the minerals available in small scale in our division.

Minerals	Available place	G.N Division
Sand	Ariyalai South East	J/89
	Ariyalai East (Poompugar)	J/90
	Ariyalai Centre West	J/96

J/89, J/90 Grama Niladari Divisions came under the high security zone and there was no civil administration after 1995 upto 2010. Army started to vacate themselves these divisions from 2009 and total area of the division was handed over for civil administration in 2011. It was after this, a huge amount of sand was excavated. Due to this sand excavation, the ground water is getting polluted, therefore sand excavation is prohibited in Ariyalai area. However, illegal sand excavation continues to take place.

5.3 Small/ Medium Cottage Industries and Employees Particulars

There are so many small cottage industries in the Nallur Divisional Secretariat Division. They produce palmyrah related products, pottery, Candle, beedi, cigars, pappadam production and garment designing. The details are as follows:
